

SuperDry® Launches Solder Paste Storage With Traceability

Moisture specialist Super Dry Totech has launched new solutions for solder paste storage, bringing both temperature control and 4.0 traceability while eliminating the uncontrolled management of solder inventory.

Solder paste is a shelf-life dependent item and manufacturers recommend it be stored in a First In-First Out manner.

Refrigerated storage prolongs the shelf life of solder paste and upon delivery, it should be directly placed into refrigerated storage, typically <math><10^{\circ}\text{C}</math>.

Generally, solder paste is stable at temperatures less than

Newly launched Model XSDC 601 solder paste storage cabinets with network compatibility maintain an internal temperature of
